Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to an elastic permeable pavement, classified in class 404, subclass 17.
 - II. Claims 12-18, drawn to a method of paving elastic permeable pavement, classified in class 404, subclass 72.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the elastic permeable pavement product can be made by another process that does not require the rolling at the specified temperature and weight and recited curing time.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Evan Witt on October 25, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3671

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
